Aigritec • nov 2020 - sept 2021
Research master thesis

- Research in the field of self-supervised depth estimation. Came up with two novel loss functions and a new transformer / CNN based architecture. (Python, Pytorch, Linux, Docker)

3+ year work experience at Rabobank, FOX, KFC (finance field)

Academic profile

MSc Artificial Intelligence

UvA , 2018 - 2021

- Grade: 7 +
- Main courses: Machine learning, Deep learning, NLP, Computer vision, Reinforcement learning, Information retrieval
- English master

BSc Business Economics

HvA, 2016 - 2019

- Grade 7.5 +
- Including board year

Volunteer work - refugee project

Living in a living project together with refugees and Dutch people. I am responsible for helping the refugees with their first steps in Amsterdam and the group dynamic in the house (10 people). Living here gives me a lot of energy and it is challenging me in new situations.
